

MAINTENANCE CHEMICALS FOR INDUSTRY

## Product Information

# GARD EV60 HOT MELT CLEANER

### DESCRIPTION

**GARD EV60** is a new liquid formulation developed to quickly and easily remove heavier contamination of hot melt adhesive from machinery and components, throughout the Bottling, Food and Packaging Industries.

### AREAS OF USE

**GARD EV60** can be used to clean down label stations, guide rails, applicator wheels, label carriages, label brushes, belts and machine guards without causing any damage to plastic i.e. crazing/clouding.

### SAFER

This unique formulation is Non-Flammable and Non-Corrosive

### ODOURLESS

**GARD EV60** is extremely low odour in use, which means the risk of tainting is completely ELIMINATED.

### POWERFUL

**GARD EV60** immediately penetrates and dissolves all hot melt glue leaving machinery and surfaces free from adhesive deposits.

### EASY TO USE

Simply apply **GARD EV60** via a clean cloth to the contaminated areas and simply wipe clean.

(Easy to follow instructions are on every pack)

Nonfood Compounds  
Program Listed (K3)  
147619
